GR2:

"Adding to calendar" was included as an important task but missing in first design. Point of this exercise was to attempt to create 3 completely different designs (aka no need to iterate just yet). Suggestion for presentation improvement: try utilizing the whitespaces surrounding an image so that both the image and its contextual text can be viewed simultaneously.. It is sometimes difficult to follow what you're saying with what you're showing if the reader has to keep scrolling up and down.
