Added by Devin Stronge, last edited by Ju Ho Kim on May 10, 2012 16:53

Welcome to the wiki for the 6.813/6.831 User Interface Design & Implementation **class.**

The primary purpose of this wiki is for your project group to publish information about the project to the rest of the class, including some of the artifacts you have created during the course of your project. You can also use it for communication within your group.

We also prepared some useful UI design resources here that would be of interest to the entire class. Feel free to contribute to this section as well.

Announcements

- **5/10/12 - Add your madness material here.**
- **1/23/12** - The first lecture is Wednesday, February 8, at 1pm in 34-101. Hope to see you there!
